TENDER No.: PVEPPOC-DRL-2025-014

				<p><i>Note: Please be informed that the fishing net around the DHN-1X well will be cut and removed prior to operation.</i></p>
<p>2.</p>	<p>DHN-1X WELL CONDITION</p>		<p>Contractor would like to inform Company that with the well left subsea for >10 years and without CP protection nor regular maintenance, it is important to have ROV inspection to verify the condition of the well.</p> <p>Areas to look out for are VX/VT gasket sealing surface, tieback sealing surfaces and tieback profiles etc.</p> <p>From past experiences with other End Users, they would typically perform this ROV inspection and also carry out well clean up w/ ROV tooling like “suck and blow”, gasket profile cleaning tool and ROV brushes to clean the ID of the well to remove debris and potentially marine growth. All these are done to increase the success rate of the subsea tieback completions.</p> <p>Hence, Contractor would like to recommend Company to perform ROV inspection with Contractor’s field service hands.</p>	<p>Noted</p>
